EXAMINER'S STATEMENT FOR REASONS FOR ALLOWANCE

Drawings

1. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter: The prior art made of record discloses methods of determining Q factors and bit error rates as well as methods to optimize communications based on non-linear effects. The prior art however fails to explicitly disclose or reasonably suggest a method of determining spectral profiles of quality parameters for all optical channels and then evaluating the spectral profiles to distinguish between a Kerr effect and a non-linear scattering process as a reason for interactions between the optical channels in a WDM signal. Therefore claims 1-10 are allowed.

Inventorship

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2874

Priority

4. Acknowledgment is made of applicant's claim for foreign priority under 35

U.S.C. 119(a)-(d). The certified copy has been filed on 3/5/02. ***Information Disclosure***

Statement

5. The information disclosure statement (IDS) submitted on 08/5/2003 has been considered by the examiner and made of record (note the attached copy of form PTO-1449).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. United States Patent Number 6,452,707 to Puc et al. for a method for improving spectral efficiency that includes steps to determine a quality parameter and a spectral profile of said parameters.
